FALKIRK.

JAMES FRANCIS FERGUSON, M.D.

DAVID H. SPRAGUE, M.D.

On the Highlands of the Hudson, near Central Valley, Orange County, New York. A home for treatment of nervous and mental diseases, and the alcohol and opium habits.

Falkirk is 800 feet above sea-level; the grounds cover over 200 acres, are well shaded, and command a magnificent view. Within them is a lake of pure water covering over 50 acres. The buildings, constructed on the cottage system, are new, steam-heated, and lighted by gas, and the water-supply is from pure mountain springs. All the living rooms face south-west, and every provision is made for comfortable home-living. The best methods in sewerage have been followed, and the arrangements for comfort and recreation include a sun-room, steam-heated in winter, for sun-baths and indoor exercise.

Dr. Ferguson and Dr. Sprague may be consulted at their office, 168 Lexington Avenue, New York City, on Tuesdays and Fridays, between 11.30 A.M. and 12.30 P.M., or by appointment, or may be addressed at Central Valley, Orange County, New York.

NOT A NECESSITY, BUT A GREAT CONVENIENCE.

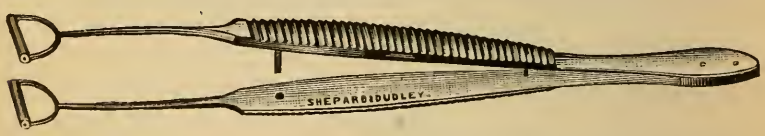
Strict personal attention to Physicians' Prescriptions at all hours of the day or night.

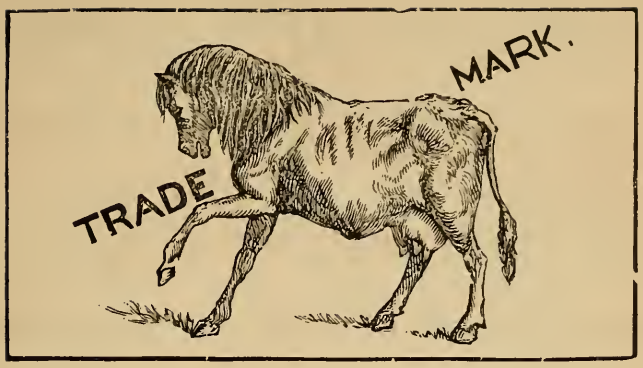


150 William St., New York City.

Dear Doctor:

We have the complete line of Surgical Instruments of a quality that will never disappoint you. Our specialties are in the finer grades. Our patterns are always the latest and are tested and examined by a competent Surgeon. We respectfully solicit your trade.

SHEPARD & DUDLEY.



DR. BRUSH'S KUMYSS.

A good food and refreshing drink.

Will be retained, as a general rule, by stomachs that reject everything else. In febrile diseases it does not produce biliousness like an ordinary milk diet, but quenches the thirst efficiently and at the same time nourishes the patient abundantly. Prepared from the whole milk of my own cows. These animals are perfectly healthy, fed and cared for properly under my own personal supervision.

REMOVAL CARD.

NEW YORK, June, 1892.

DEAR DOCTOR:

The facilities of my former place of business having proved inadequate to supply the constantly increasing demand for **Matzoon** and **Matzol,** I have removed to more capacious and suitable quarters at **73 Lexington Avenue, between 25th and 26th Streets,** where I shall always be pleased to welcome such members of the profession who may desire to test for themselves the efficacy and pleasantness of my preparations.

Hoping to be favored with a visit at your convenience, I remain,

Yours very truly,

MARKAR G. DADIRRIAN, M.D.

MATZOL.

MATZOL CONSISTS of 50 per cent. PURE NORWEGIAN COD LIVER OIL, and **MATZOON.**

The advantages of Matzol, the combination of Matzoon and Cod Liver Oil, are:

FIRST.—MATZOON being very palatable, disguises the taste of the oil almost entirely and makes ***MATZOL*** slightly acid and pleasant tasting.

SECOND.—MATZOON being most easily digested and containing abundant natural lactic acid greatly helps the digestion and the assimilation of the oil in ***MATZOL***.

THIRD.—MATZOON being useful as nourishment, assists the oil in building up the system, while in most other emulsions the bulk is increased with non-nourishing and even objectionable articles.

FOURTH.—***MATZOL*** is neither medicated nor flavored, and can be readily diluted with water or any other desired liquid.

MATZOL has no fishy aftertaste, neither does it cause eructations, nor does the stomach rebel against its continued use.

DOSE.—Dessert spoonful or more three times a day, as indicated.

HENRY M. LYMAN, A.M., M.D., Prof. Rush Med. College of Chicago, says:

"I think ***MATZOL*** is the best emulsion of Cod Liver Oil that I have ever tried. Children take it readily with great benefit.

MATZOL can be obtained from Principal Druggists in U. S. and Canada, or direct from

PREFACE.

THE MEDICAL DIRECTORY OF THE CITY OF NEW YORK is published by the Medical Society of the County of New York as the official list of its members. For convenience, a list of all other qualified physicians of the city is appended and other matter of especial interest to the profession. The Editor hereby acknowledges his obligations to all who have aided in the preparation of this seventh volume of the Directory.

VIN MARIANI

FORMULA: "VIN MARIANI" is the concentrated extractive of the fresh leaf Erythroxylon Coca, blended with a special quality of Bordeaux Wine. Each half-litre bottle contains the medicinal properties of two ounces of selected leaves.

DOSE: Usually a wine-glassful three times a day, half an hour before meals or immediately after. Increased or diminished, at discretion of the physician.

INDICATED: As a pleasant, mild stimulant, without unpleasant reaction; a diffusible tonic; a strengthener of the nervous system, with especial good effect on the digestive and respiratory organs; convalescence and enfeebled conditions. Effect is immediate and lasting.

NOTE: Extensively used in Hospitals, Cliniques and private practice, its merits are recorded by the medical press of Europe and America. Uniform excellence and recognized efficacy won the absolute confidence and esteem of every physician who subjected it to test, and it may be affirmed that wherever Coca is indicated "VIN MARIANI" invariably receives the preference.

The continual increasing demand is a clear proof of the reliance placed in "VIN MARIANI" by the Medical Profession, through whom it has been popularized.

EXTRACTS FROM THE BY-LAWS OF THE SOCIETY.

"The annual meeting of the Society shall be held on the fourth Monday in October.

"Stated meetings shall be held on the fourth Monday of every month except in the months of June, July, August, and October.

"Nominations for the officers, censors, and delegates, to be elected at the annual meeting, shall be made at the stated meeting in September.

"Members whose dues are unpaid shall not be candidates for any official position in the Society, nor shall they be entitled to vote.

"Every candidate, before signing the By-laws, shall be required to pay an initiation fee of two dollars, together with the current dues, within three months from the date of his election.

"No person shall be eligible for membership in this Society who is a member of a County Society not entitled to representation in the Medical Society of the State of New York.

"The Comitia Minora shall recommend no applicant for admission to membership unless he be a graduate from a medical college in good standing or a licentiate of a regular unsectarian State or County Medical Society of this or any other State; or, if his diploma or license be of sectarian character, unless the applicant declares in writing his or her abnegation of sectarian principles and practice."

Resolution adopted October 28, 1889.

"*Resolved*, That, hereafter, members two years or more in arrears of dues shall have their names omitted from the published list of the Society; and that while thus in arrears such members shall receive neither the notices of the Society's meetings nor its publications."

ARISTOL Antiseptic: Cicatrisant.

EUROPHEN Iodoform Substitute: Antisyphilitic.

SULFONAL-BAYER Hypnotic: Sedative.

PHENACETINE-BAYER Antipyretic: Analgesic.

ARISTOL is widely esteemed by physicians for the excellent results it has given in the treatment of all external traumatisms; in cavital lesions, and in many of the dermatoses. As a surgical application, it is safe, inodorous and non-toxic. Supplied in ounces.

SULFONAL-BAYER is indicated in all the insomnias and in the cerebral disturbances of insanity. It is a pure hypnotic, a safe and effective remedy, and it does not give rise to a drug habit. For the correct method of administration *see pamphlet.* Supplied in ounces, tablets and pills.

EUROPHEN, as a substitute for iodoform, is winning an enviable place in therapeutics. It has a special value in specific lesions, while as a surgical dressing in ulcerations, open wounds, and septic conditions of the cavities, it has given excellent results. Supplied in ounces.

PHENACETINE-BAYER is a true and distinct organic derivative. It is indicated in influenza (*la grippe*); in all fevers, with or without pain; in rheumatism and neuralgia; and in phthisis and pertussis. It acts promptly and is both safe and effective. Supplied in ounces, tablets and pills.

EUROPHEN-ARISTOL, a preparation consisting of equal parts of each medicament, is also supplied in ounces.

Descriptive Pamphlets forwarded on application.

CASWELL, MASSEY & CO.'S
QUININE CHOCOLATES

(REGISTERED IN U. S. PATENT OFFICE.)

THE Chocolate used in the preparation of these tablets disguises the bitter taste of the Quinine without, in the least, impairing its therapeutic value. They are suitable in the entire range of conditions where Quinine is indicated, but are especially recommended in the subacute and chronic forms of malaria, characterized by headache, neuralgia, loss of appetite, and general *malaise*. They are quite palatable to children, and, for this reason, will be found invaluable in entero-colitis, and other spring and summer complaints; or, as a restorative tonic in all cases of debility. The Chocolates are unequalled as an elegant and reliable prophylactic for persons residing in or passing through malarial districts. Each tablet contains one grain of tannate of quinine; the dose, therefore, ranges from one or two daily, to a dozen or more, repeated as often as necessary, according to circumstances, or as directed by a physician. Retail price, 50 cts. per box.

DEAR DOCTOR:

HAVE YOU TESTED

Schlotterbeck's — Mist. Helonin Comp.

INDICATED in Dysmenorrhœa, Amenorrhœa, Menorrhagia, Leucorrhœa, Subinvolution, Threatened or Habitual Miscarriage, Vomiting in Pregnancy and particularly in the protracted first stage of *primaparæ*, in which relief may be obtained from the useless nagging pains by the administration of this preparation. Composed of the resinoids of Helonias Dioica, Senecio Gracilis and Avena Sativa.

Does *not* contain any *Opiate* or *Narcotic* of any kind.

In cases of painful Dysmenorrhœa this remedy should be administered in teaspoonful doses every hour or even half-hour till the paroxysm of pain is passed, always using a hot vehicle.

Any physician not having seen this preparation will be furnished with a sample bottle free of charge upon application.

Schlotterbeck's — Mist. Glyconin Comp.

AN Egg Emulsion of Pancreatized Cod Liver Oil (40 per cent), Sherry Wine (Duff Gordon) (40 per cent), Phosphoric Acid (1¼ per cent), Egg, Glycerine and Carminative Aromatics. Every drop possesses activity. This preparation is especially indicated in cases of Defective Assimilation, Impaired Circulation, Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis and General Debility.

Owing to the partial digestion of the oil, this preparation will be borne by the most delicate stomach. The *offensive eructations* produced by the use of the ordinary Emulsions are not experienced in using MIST. GLYCONIN COMP.

MIST. GLYCONIN COMP. will readily mix with water or milk if desired, and retails for One Dollar a pint.

PREPARED BY THE

Schlotterbeck & Foss Co.,

THE MEDICAL SOCIETY OF THE STATE OF NEW YORK.

ORGANIZED IN 1806.

"EACH County Medical Society is entitled to as many delegates as there are Assembly Districts in the county of which it is the society."

The Medical Society of the County of New York is, therefore, entitled to thirty delegates, whose term of office is three years.

"Delegates who have attended, as such, two annual meetings of the State Society become eligible for election as permanent members."

"The Annual Meeting is held in the city of Albany on the first Tuesday in February in each year."

CODE OF ETHICS OF THE MEDICAL SOCIETY OF THE STATE OF NEW YORK.

I. The Relations of Physicians to the Public.
II. Rules Governing Consultations.
III. The Relations of Physicians to Each Other.

I.—*The relations of physicians to the public.*

It is derogatory to the dignity and interests of the profession for physicians to resort to public advertisements, private cards, or handbills, inviting the attention of individuals affected with particular diseases, publicly offering advice and medicine to the poor without charge, or promising radical cures; or to publish cases or operations in the daily prints, or to suffer such publications to be made; or through the medium of reporters or interviewers, or otherwise, to permit their opinions on medical and surgical questions to appear in the newspapers; to invite laymen to be present at operations; to boast of cures and remedies; to adduce certificates of skill and success, or to perform other similar acts.

It is equally derogatory to professional character, and opposed to the interests of the profession, for a physician to hold a patent for any surgical instrument or medicine, or to prescribe a secret nostrum, whether the invention or discovery or exclusive property of himself or of others.

It is also reprehensible for physicians to give certificates attesting the efficacy of patented medical or surgical appliances, or of patented, copyrighted, or secret medicines, or of proprietary drugs, medicines, wines, mineral waters, health resorts, etc.

II.—*Rules governing consultations.*

Members of the Medical Society of the State of New York, and of the medical societies in affiliation therewith, may meet in consultation legally qualified practitioners of medicine. Emergencies may occur in which all restrictions should, in the judgment of the practitioner, yield to the demands of humanity.

To promote the interests of the medical profession and of the sick, the following rules should be observed in conducting consultations:

The examination of the patient by the consulting physician should

be made in the presence of the attending physician, and during such examination no discussion should take place, nor any remarks as to diagnosis or treatment be made. When the examination is completed, the physicians should retire to a room by themselves, and after a statement by the attending physician of the history of the case, and of his views of its diagnosis and treatment, each of the consulting physicians, beginning with the youngest, should deliver his opinion. If they arrive at an agreement, it will be the duty of the attending physician to announce the result to the patient, or to some responsible member of the family, and to carry out the plan of treatment agreed upon.

If in the consultation there is found to be an essential difference of opinion as to diagnosis or treatment, the case should be presented to the patient, or some responsible member of the family, as plainly and intelligently as possible, to make such choice, or pursue such course, as may be thought best.

In case of acute, dangerous, or obscure illness, the consulting physician should continue his visits at such intervals as may be deemed necessary by the patient or his friends, by him, or by the attending physician.

The utmost punctuality should be observed in the visits of physicians when they are to hold consultations, but as professional engagements may interefere or delay one of the parties, the physician who first arrives should wait for his associate a reasonable period, after which the consultation should be considered as postponed to a new appointment. If it be the attending physician who is present, he will of course see the patient and prescribe; but if it be the consulting physician, he should retire, except in an emergency, or when he has been called from a considerable distance, in which latter case he may examine the patient, and give his opinion in writing, and under seal, to be delivered to his associate.

III —*The relations of physicians to each other.*

All practitioners of medicine, their wives and their children, while under paternal care, are entitled to the gratuitous services of any one or more of the faculty residing near them whose assistance may be desired.

Gratuitous attendance cannot, however, be expected from physicans called from a distance, nor need it be deemed obligatory when opposed by both the circumstances and the preferences of the patient.

The affairs of life, the pursuit of health, and the various accidents and contingencies to which a medical man is peculiarly exposed may

require him temporarily to withdraw from his duties to his patients, and to request some of his professional brethren to officiate for him. Compliance with this request is an act of courtesy which should always be performed with the utmost consideration for the interests and character of the family physician, and when exercised for a short period all the pecuniary obligations for such services should be awarded to him. But if a member of the profession neglects his business in quest of pleasure and amusement he cannot be considered as entitled to the advantages of the frequent and long-continued exercise of this fraternal courtesy without awarding to the physician who officiates the fees arising from the discharge of his professional duties.

In obstetrical and important surgical cases, which give rise to unusual fatigue, anxiety, and responsibility, it is just that the fees accruing therefrom should be awarded to the physician who officiates.

Diversity of opinion and opposition of interest may, in the medical as in other professions, occasion controversy, and even contention. Whenever such cases unfortunately occur, and cannot be easily terminated, they should be referred to the arbitration of a sufficient number of physicians before appealing to a medical society or the law for settlement.

If medical controversies are brought before the public in newspapers or pamphlets, by contending medical writers, and give rise to or contain assertions or insinuations injurious to the personal character or professional qualifications of the parties, the effect is to lower in the estimation of the public, not only the parties directly involved, but also the medical profession as a whole. Such publications should therefore be brought to the notice of the county societies having jurisdiction, and discipline inflicted, as the case may seem to require.

ABSTRACTS FROM MEDICAL LAWS OF THE STATE OF NEW YORK.

LICENSE TO PRACTISE MEDICINE.

AN ACT

To regulate the licensing and registration of physicians and surgeons, and to codify the medical laws of the State of New York. Laws of 1887, ch. 647; § 2 as amended by laws of 1890, ch. 500.

SECTION 1. No person shall practise physic or surgery in this State who shall not have attained the age of twenty-one years; and no person shall practise as aforesaid unless he or she shall be, at the time this act shall take effect, a person lawfully engaged in such practice in this State under license or authority conferred by its laws then in force, and lawfully registered pursuant to chapter five hundred and thirteen of the laws of eighteen hundred and eighty, and the acts amendatory thereof, or unless he or she shall be licensed or authorized so to practise by the provisions of this act, and registered as herein prescribed.

§ 2. From and after the date of the taking effect of this act no person not theretofore licensed or authorized to practise physic or surgery in this State shall be deemed so licensed or authorized except one of the three following classes:

First. All who shall have been graduated from an incorporated medical school or college in this State with the degree of doctor of medicine, after substantial compliance with all the requirements of the general laws and of the charter of said corporation regulating the term and amount of study, attendance and attainment requisite to obtain said degree; provided that no person shall receive the degree of doctor of medicine, or be licensed to practise physic or surgery in this State unless after the age of eighteen he shall have pursued the study of medical science for at least three years in a chartered medical school or with some physician or surgeon duly authorized by law to practise physic or surgery; and shall have attended two[1] complete courses of lectures in some legally incorporated medical school or college, in good standing at the time of such attendance, prior to the granting to him or her of a diploma or license; provided, further, that two courses of lec-

tures, both of which shall be either begun or completed within the same calendar year, shall not satisfy the above requirement.

Second. All who have received said degree from the regents of the University of the State of New York, after substantial compliance with the legal requisites preliminary to its attainment, and after examination by a legally constituted board of medical examiners of this State.

Third. All who, having been graduated from incorporated medical schools or colleges without the State as doctors of medicine, or licensed to practise physic or surgery under the laws of those European countries in which said degree does not confer the right so to practise, shall procure their diplomas from said corporations or their licenses from such countries, to be indorsed by the Regents of the University on the recommendation of a legally constituted board of medical examiners of this State. Every such indorsement shall be in the form of schedule A or of schedule B provided by the tenth section of this act. The regents shall keep a record of such indorsements, and may require applicants to verify their statements under oath; any indorsement made with fraudulent intent, or gross carelessness or ignorance, shall be deemed a misdemeanor, and shall subject the indorser or indorsers, upon conviction thereof, to a fine of two hundred and fifty dollars; provided, however, that no such indorsement as is above specified shall be made until the applicant thereof shall file with the person, officer, or body above named as authorized to make such indorsement, a certificate, signed by the Secretary of the University of the State of New York, showing that such applicant has received the degree of bachelor or master of arts, of bachelor or master of science, or of bachelor or doctor of philosophy, from a college or university duly authorized to confer the same; or that he has passed an examination conducted under the authority and in accordance with the rules of the Regents of the University of the State of New York, in arithmetic, grammar, geography, spelling, American history, English composition, and elementary physics; or that he shall possess qualifications which the regents have considered and accepted as fully equivalent to the above-named qualifications; as such degrees and certificates are more particularly defined in an act of the Legislature of the State of New York, by chapter 468 of the laws of 1889, entitled "An Act to provide for the preliminary education of medical students," and as the same may be hereafter amended.

§ 3. Every person who, at the time this act shall take effect, shall be practising lawfully physic or surgery in this State, under the authority and license conferred by the laws then in force, but who shall not be

then duly registered in the county where he or she practises; and every person who shall thereafter become lawfully authorized or licensed to practise physic or surgery in this State shall register in a book to be kept in the clerk's office of the county in which such practice is carried on, his or her name, residence, place and date of birth, and authority for practising as aforesaid. Every person who shall apply to register as a physician or surgeon shall be required, before registration, to subscribe and verify by oath or affirmation, before a person qualified to administer oaths in this State, an affidavit which shall be filed and preserved in a bound volume. This affidavit shall be in the form prescribed in schedule C, provided by the tenth section of this act. Every person registering as aforesaid shall exhibit to the county clerk his or her diploma or license, or in case of loss, a copy of either, legally certified as are copies of documents admitted in evidence, or a duly attested transcript of the record of its conferment from the body conferring it, upon which the said clerk shall indorse, or stamp his name, and the words, "Presented and registered as.....authority to practise physic and surgery by....., on the.....day of....., in the clerk's office of.....county." The said clerk shall also give to every registered physician or surgeon a certificate in the form of schedule D, provided by the tenth section of this act. For all of his said services the county clerk shall receive as a total fee for registration, affidavit, and certificate the sum of one dollar. It is provided, however, that nothing in this act shall require any physician or surgeon who shall have duly registered lawful authority to practice as such, conformably to the provisions of chapter five hundred and thirteen of the laws of eighteen hundred and eighty, and the acts amendatory thereof, to register again under the provisions of this act, in any county where he or she shall have registered already.

§ 4. A practising physician or surgeon, having registered lawful authority to practise physic or surgery in one county, who shall remove his practice or part thereof to or regularly engage in practice or open an office in another county, shall exhibit in person to the clerk of such other county, or shall send him through the mail by registered letter his certificate of registration, and if such certificate shows lawful authority to have been registered, said clerk thereupon shall register said applicant in said latter county, on receipt of a fee of twenty-five cents. The clerk shall stamp or indorse upon such certificate the words, "Registered also in.....county," and return the same, and every certificate and indorsement made pursuant to the provisions of this act shall be *prima facie* evidence in any legal proceeding that the person named has registered in the office issuing the same, the authority stated in the transcript.

. . . . . .

§ 6. No person shall be licensed or permitted to practise physic or surgery in this State who has been convicted of a felony by any court of competent jurisdiction; and if any person who is or hereafter shall be duly licensed to practise physic or surgery in this State shall be convicted of a felony, as aforesaid, his or her license to so practise, if any, shall be revoked by the fact of such conviction having been had. Any person who shall wilfully swear falsely to any statement contained in any affidavit made pursuant to the provisions of this act shall be deemed guilty of a felony, and subject to conviction and punishment for perjury; any person who falsely and without authority shall counterfeit, make or alter any diploma, certificate or instrument constituting a license to practise physic or surgery within this State, or any certificate or indorsement given in pursuance of this act, shall be deemed guilty of a felony, and be subject to conviction and punishment for forgery in the second degree; any person who shall practise physic or surgery under a false or assumed name, or who shall falsely personate another practitioner of a like or different name, shall be deemed guilty of a felony, and shall be subject to conviction and punishment for false personation: and any person guilty of violating any of the other provisions of this act, not otherwise specifically punished herein, or who shall buy, sell, or fraudulently obtain any medical diploma, license, record or registration, or who shall aid or abet such buying, selling or fraudulently obtaining thereof, or who shall practise physic or surgery in this State under cover of a diploma or license that shall have been illegally obtained, or that shall have been signed or issued unlawfully or under fraudulent representations, or mistake of fact in material regard or who, after conviction of a felony, as aforesaid, shall attempt to practise physic or surgery in this State, and any person who shall assume the title of doctor of medicine, or append the letters "M.D." to his or her name, without having received the degree of doctor of medicine from some school, college or board empowered by law to confer said degree or title, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not less than two hundred and fifty dollars, or imprisonment for six months for the first offence, and upon conviction of a subsequent offence, by a fine of not less than five hundred dollars or imprisonment for not less than one year, or by both fine and imprisonment. Any person who, not being then lawfully authorized to practise physic or surgery in this State and so registered according to law, shall practise on or after the first day of October, eighteen hundred and eighty-seven, physic or surgery within this State without the license and registration provided for in this act shall be deemed guilty of a misdemeanor, and

on conviction thereof shall be punished by a fine of not less than fifty dollars for the first offence, and for each subsequent offence by a fine of not less than one hundred dollars, or by imprisonment for not less than one hundred days, or by both fine and imprisonment.

When any prosecution under this act is made on the complaint of a lawfully incorporated medical society of this State, or a county society entitled to representation in a State society or association, the fines when collected shall be paid to the society making the complaint, and any excess of the amount of fines so paid over the expense incurred by the said society in enforcing the medical law of this State, shall be paid at the end of the year to the county treasurer, for the use of the poor of said county.

§ 7. The duly incorporated medical societies of any county in which any person shall practise physic or surgery without lawful authority or registration may, upon proof of such practice, recover from such practitioner, in an action before any justice of the peace, a penalty of twenty-five dollars and the cost of the action for the first judgment, and upon every subsequent judgment for the same offence a penalty of fifty dollars and the cost of the action; provided that said societies shall pay to the county treasurer for the use of the poor of said county any surplus that may accrue in their hands from the excess of fines and penalties collected over the disbursements of said society for counsel fees and the expenses incident to the enforcement of this act by them.

§ 8. Nothing in this act shall be construed to punish commissioned medical officers serving in the army or navy of the United States, or in the United States marine-hospital service, while so commissioned, or any one while actually serving as a member of the resident medical staff of any legally incorporated hospital, or any legally qualified and registered dentist exclusively engaged in practising the art of dentistry, or interfere with manufacturers of artificial eyes, limbs or orthopedical instruments or trusses of any kind from fitting such instruments on persons in need thereof; or any lawfully qualified physicians and surgeons residing in other States or countries meeting registered physicians and surgeons of this State in consultation, or any physician or surgeon residing on the border of a neighboring State, and duly authorized under the laws thereof to practise physic or surgery therein, whose practice extends into the limits of this State; providing that such practitioner shall not open an office or appoint a place to meet patients or receive calls within the limits of the State of New York; or physicians duly registered in one county of this State called to attend isolated cases in another county, but not residing or habitually practising therein.

MEDICAL STUDENTS' EXAMINATIONS.

AN ACT

To provide for the preliminary education of medical students. Laws of 1889, ch. 468, as amended by laws of 1890, ch. 499.

SECTION 1. Before the regents of the University of the State of New York or the trustees of any medical school or college within this State shall confer the degree of doctor of medicine on any person, they shall require him to file with the secretary or recording officer of their university or college a certificate *signed by the Secretary of the University of the State of New York,* showing *either* that *he possesses the degree of bachelor or master of arts, of bachelor or master of science, or of bachelor or doctor of philosophy, received by him from a college or university duly authorized to confer the same, or that, during or* prior to *the first year of his medical study within this State,* he passed an examination conducted under the authority of the regents of the University of the State of New York, or by the faculty of a medical school or college entitled to confer the degree of doctor of medicine, in accordance with the standard and rules of said regents, in arithmetic, grammar, geography, orthography, American history, English composition, and the elements of natural philosophy, or in their substantial equivalents approved by said regents; *or that he possessed qualifications which the regents considered and accepted as fully equivalent to the above-named qualifications.*

§ 2. This act shall not apply to persons who have already entered upon the prescribed three years' study of medicine, nor shall it alter the time of study or the courses of medical instruction required to be pursued in the medical colleges of this State by existing statutes.

BOARDS OF MEDICAL EXAMINERS.

AN ACT

To establish boards of medical examiners of the State of New York for the examination and licensing of practitioners of medicine and surgery; to further regulate the practice of medicine and surgery. Laws of 1890, ch 507.

SECTION 1. From and after the first day of September, 1891, there shall be and continue to be three separate boards of medical exam-

iners for the State of New York, one representing the Medical Society of the State of New York, one representing the Homœopathic Medical Society of the State of New York, and one representing the Eclectic Medical Society of the State of New York. Each board shall consist of seven members, and each of said members shall serve for a term of three years from the first day of September next after his appointment, with the exception of those first appointed, who shall serve as follows: Two of each board for one year, two of each board for two yoars, and three of each board for three years from the first day of September, 1891. The power of appointment shall vest in the board of regents of the University of the State of New York, which shall appoint the members of said boards of examiners respectively from lists of nominees to be submitted by each of the said three medical societies, the number of nominees by each of said societies to equal or exceed twice the number of appointments so to be made from each of said societies. Each of said nominees shall be nominated by a majority vote at the annual meetings of the society with which said nominee may be in affiliation, and the names of persons so nominated shall be transmitted before the first day of July, 1891, to the said board of regents, under the seal of and signed by the president and secretary of the society so nominating. From these lists of nominees, respectively, said board of regents shall prior to or during the month of July, 1891, apppoint three separate boards of examiners, each board to be composed exclusively of members of the same medical society. In case of failure of any or all of said medical societies to submit nominees as aforesaid, said board of regents shall prior to or during the month of July, 1891, appoint members in good standing of the corresponding society or societies entitled to nominate, without other restriction. Each one of said appointees, prior to appointment, shall furnish evidence of having received the degree of doctor of medicine in course from some legally incorporated medical college authorized to confer the same, and shall certify to said board of regents to having practised medicine or surgery under the laws of this State for a period of not less than five years immediately prior to such appointment. The said board of regents shall fill vacancies caused by death or otherwise, for unexpired terms of said examiners, from the respective list of nominees submitted by the said medical societies; and may remove any member of either of said boards for continued neglect of the duties required by this act, or, on recommendation of the medical society of which said members may be in affiliation, for unprofessional or dishonorable conduct.

The board of regents shall in their first appointments designate the number of years for which each appointee shall serve. The appointments of successors to those members whose terms of office will expire on the first day of September of each year shall be made by the regents during or before the month of July of such year, upon the same conditions and requirements as hereinbefore specified with reference to the appointment of three separate examining boards, each to be composed exclusively of members of the same medical school and society as are hereinbefore provided.

§ 2. Said boards shall be known by the name and style of Boards of Medical Examiners of the State of New York. Every person who shall be appointed to serve on either of said boards shall receive a certificate of appointment from the regents of the University, and within thirty days after receiving such certificate shall take, subscribe, and file in the office of the Secretary of State the oath prescribed by the twelfth article of the Constitution of this State. Each of said boards shall be authorized to take testimony concerning all matters within its jurisdiction, and the presiding officer for the time being of either of said boards, or of any of the committees thereof, may issue subpœnas and administer oaths to witnesses. Each of said boards of examiners shall make and adopt all necessary rules, regulations, and by-laws not inconsistent with the Constitution and laws of this State or of the United States, whereby to perform the duties and transact the business required under the provisions of said act, said rules, regulations, and by-laws to be subject to the approval of said regents.

§ 3. From the income provided by this act the regents may pay, not to exceed said income, all proper expenses incurred by its provisions; and if any surplus above said expenses shall remain at the end of any year, it shall be apportioned by said regents among said examiners *pro rata*, according to the number of candidates examined by each.

§ 4. The first meeting of each of the examining boards respectively shall be held pursuant to a call issued by the secretary of the board of regents within two months from the first day of September, 1891, suitable notice in the usual form being given to each of the members thereof, specifying the time and place of meeting. At the first meeting of each of the boards respectively an organization shall be effected by the election, from their own membership, of a president and secretary. For the purpose of examining applicants for license, each of said boards of medical examiners shall hold one or more stated or special meetings in each year, pursuant to a call of the board of regents, due notice of which shall be made public, at such times and places as may be de-

termined by the board of regents; but each examination shall be under the supervision of an examiner appointed by the board of regents, and who shall not be a member of any board of medical examiners. At said stated or special meetings a majority of the members of a board shall constitute a quorum thereof, but the examination may be conducted by a committee of one or more members of the board of examiners duly authorized by such board.

§ 5. The several boards of medical examiners shall submit to the board of regents lists of examination questions for thorough examinations in anatomy, physiology and hygiene, chemistry, surgery, obstetrics, pathology and diagnosis, and therapeutics, including practice and materia medica. From the lists of questions so submitted the board of regents shall select the questions for each examination, and present the same to the candidates at each examination by an examiner appointed therefor by the board of regents, and such questions for each examination shall be so selected as to require the same standard of excellence from all candidates, except that in the department of therapeutics, practice, and materia medica the questions shall be in harmony with the tenets of the school selected by the candidate.

§ 6. Said examinations shall be conducted in writing in accordance with the rules and regulations prescribed by the board of regents, and shall embrace the subjects named in Section 5 of this act. At the close of said examination the examiner appointed by the board of regents having supervision thereof shall forthwith deliver to the board of medical examiners having charge of such examination, or to their duly authorized committee, the questions submitted to and the answers of each applicant, and such board of medical examiners, without unnecessary delay, shall transmit to the regents of the University an official report, signed by the president, secretary, and each acting member of said board of examiners, stating the examination average of each candidate in each branch, the general average, and the result of the examination, whether successful or unsuccessful. Said report shall embrace all the examination papers, questions, and answers thereto. All the examination papers so returned shall be kept for reference and inspection among the public records of the University.

§ 7. On receiving from either of said boards of medical examiners such official report of the examination of any applicant for license, the said regents shall issue to every applicant who shall have been returned as having successfully passed said examination, and who shall, in their judgment, be duly qualified therefor, a license to practise medicine and surgery in the State of New York. The board of regents shall require

the same standard of qualifications from all candidates, except in the department of therapeutics, practice, and materia medica, in which the standard shall be determined by each of the boards of medical examiners respectively. Every license to practise medicine or surgery, issued pursuant to the provisions of this act, shall be subscribed by the chancellor and secretary of the University of the State of New York, by each medical examiner who reported the licentiate as having successfully passed said examinations, and also by those of the regents who examined and approved the credentials of said licentiate upon the application for examination. It shall also have affixed to it, by the the person authorized to affix the same, the seal of said University. Every such license shall be substantially in the following form:

"The Regents of the University of the State of New York. To all whom it may concern, greeting:

"Be it known that A B, on the.....day of....., A. D..... having offered to us satisfactory proof that ..... was more than twenty-one years of age, and had received a proper preliminary education; that ....had attended three full courses of medical instruction, the last course at..... in....., in the year of....., and had received from the.....of.....the degree of doctor of medicine, we thereupon gave a written order for the examination of said A B before one of the boards of medical examiners of the State of New York; that the said A B was fully examined before said board and found proficient and qualified to practise medicine and surgery by the examiners whose signatures are hereto attached. We, therefore, have granted to said A B this our license to practise medicine and surgery in the State of New York as a physician and surgeon, and have caused the names of the chancellor and secretary of our board of regents and said examiners to be subscribed, and the seal of the University to be affixed hereto, and have also caused this license to be recorded in book.....of medical license, on page....." Before said license shall be issued it shall be recorded in a book to be kept in the office of said regents, and the number of the book and the page therein containing said recorded copy shall be noted in the body of the license. Said records shall be open to public inspection, under proper restrictions as to their safe-keeping, and in all legal proceedings shall have the same weight as evidence that is given to the record of the conveyances of land.

§ 8. From and after the first day of September, 1891, any person not theretofore lawfully authorized to practise medicine and surgery in this State, and desiring to enter upon such practice, may deliver to the regents of the University, upon the payment of twenty-five dollars into

the treasury of the University of the State of New York, a written application for license, together with satisfactory proof that the applicant is more than twenty-one years of age, is of good moral character, has obtained a competent common school education, and has either received a diploma conferring the degree of doctor of medicine from some legally incorporated medical college in the United States, or a diploma or license conferring the full right to practise all the branches of medicine and surgery in some foreign country, and has also studied medicine three years, including three courses of lectures in different years, in some legally incorporated medical college or colleges prior to the granting of said diploma or foreign license; provided that two courses of medical lectures, both of which shall be either begun or completed within the same calendar year, shall not satisfy the above requirement. Such proof shall be made, if required, upon affidavit. Upon the making of said payment and proof, the board of regents, if satisfied with the same, shall direct the secretary thereof to issue to said applicant an order for examination by any one of said boards of medical examiners which said applicant may elect. In case of failure at any such examination, the candidate, after the expiration of six months, and within one year, shall have the privilege of a second examination by the same board to which application was first made, without the payment of an additional fee. And it is further provided that applicants examined and licensed by State examining boards of other States, on payment of ten dollars to the University of this State, and on filing in the office of said regents a copy of said license, certified by the affidavit of the president and secretary of such board, showing also that the standard of acquirements adopted by said State examining board is substantially the same as is provided by sections five and six of this act, shall, without further examination, receive from said regents a license conferring on the holder thereof all the rights and privileges provided by sections eight and nine of this act.

§ 9. On and after the first day of September, 1891, no person not theretofore a legally authorized practitioner of medicine and surgery under the laws of this State then in force, shall practise medicine or surgery in this State, unless that person shall have received from the regents of the University, after examination and approval as herein provided, a license to practise as a physician and surgeon, and unless said license shall have been registered as required under the provisions of chapter 647 of the laws of 1887, or unless such person shall hold a license from a State examining and licensing board of another State, and shall have been licensed by the board of regents as provided by this act.

§ 10. Nothing in this act shall be construed to interfere with or punish commissioned medical officers serving in the army or navy of the United States, or in the United States marine-hospital service, while so commissioned, or any one while actually serving as a member of the resident medical staff of any legally incorporated hospital, or any legally qualified and registered dentist exclusively engaged in practising the art of dentistry, or interfere with manufacturers of artificial eyes, limbs, or orthopedical instruments, or trusses of any kind, from fitting such instruments on persons in need thereof; or any lawfully qualified physicians and surgeons residing in other States or countries meeting registered physicians and surgeons of this State in consultation, or any physician or surgeon meeting on the border of a neighboring State, and duly authorized under the laws thereof to practise medicine or surgery therein, whose practice extends into the limits of this State, provided that such practitioners shall not open an office or appoint a place to meet patients or receive calls within the limits of the State of New York; or physicians duly registered in one county of this State, called to attend isolated cases in another county, but not residing or habitually practising therein.

§ 11. This act shall take effect immediately.

VICHY WITH LITHIA " "	34.104
CARLSBAD WITH LITHIA " "	34.104

My Waters are used and indorsed by over 400 Physicians.

Lithia Water and **Vichy with Lithia** were introduced by me in 1864, and received by the medical profession with so much favor that quite a number of **so-called Lithia Springs** have been brought to public notice, which, however, like most springs, contain no lithia or only traces.

Carlsbad with Lithia has been recently added.

Lithia in American Mineral Waters.

According to results obtained by DR. ELWYN WALLER, Professor of Chemistry at the School of Mines, in his very interesting paper on the "Determination of Lithia in Mineral Waters," it takes **370 gallons** of **Buffalo Lithia** to get **as much lithia as** contained in a **single six-ounce glass** of **Carl H. Schultz's Lithia Water,** or, in other words, **to get a single grain of Lithium Bicarbonate, it would be necessary to drink 92½ gallons of Buffalo Lithia.**

The complete analysis of each water is on the bottle, and the waters are guaranteed to agree with these analyses.

The duration of human pregnancy is about 275 days. This is subject to some variation, and the longest period is still undetermined. As labor occurs in the large proportion of cases between 270 and 290 days from the last menstruation, it is usual to reckon either from the first or last day of this period, taking as the mean 280 days, or a little over nine calendar months. For this approximate calculation the first day of the menstrual period may be used as being more readily ascertained. The table presents at a glance the beginning and end of 280 days for every day of the year. Find the date of menstruation in the upper line of the horizontal row and the figure below, with the corresponding month, will indicate 280 days. In leap year, if the period of pregnancy includes February, the time for labor will be one day earlier than that given in the table.

STRICTLY PROFESSIONAL.

HYDROLEINE.

(HYDRATED OIL)

Produces Rapid Increase in Flesh and Strength.

FORMULA.—Each dose contains:

Pure Cod Liver Oil	80 *m.* (drops)
Distilled Water	35 "
Soluble Pancreatin	5 Grains.
Soda	½ "
Salicylic Acid	¼ "

UNIVERSALLY PRESCRIBED.

It is sought to introduce ***this invaluable therapeutic agent*** exclusively on ***its merits*** and for that reason the Profession is appealed to ***only through the columns of Medical Journals.***

HYDROLEINE is a purely *scientific preparation* for the cure of *incipient consumption* and all forms of *wasting disease.* Its *formula* is well known, and it has the endorsement of LEADING PHYSICIANS throughout the United States. The therapeutic value of this *invaluable curative agent*, its unquestionable success and its *perfect reliability* in cases of *emaciation* occasioned by a *decay of the vital tissues*, make the prescribing of ***HYDROLEINE*** one of the necessary requisites of the successful practitioner. This great remedial agent is *thoroughly palatable*, is *easily digested;* it produces rapid increase in *flesh* and *strength* and at once inspires the patient with a *substantial hope of recovery.* This is assured by the *fact* that the *vitalizing principle* underlying ***HYDROLEINE*** is to *arrest decomposition in all its stages.*

HYDROLEINE has for the basis of its formula pure NORWEGIAN COD LIVER OIL. One teaspoonful of this preparation will give MORE SATISFACTION than three teaspoonfuls of the many usually prescribed emulsions.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE U. S.,

115 and 117 Fulton Street, New York.

A sample of Hydroleine will be sent free on application, to any physician (enclosing business card) in the United States.

No Injection of Air

WITH THE

ALPHA SYRINGE.

THE REASONS WHY

The ALPHA Continuous Flow Syringes are the Best:

First. They are the only Bulb Syringes producing a continuous flow with one Bulb, and no more parts than are used on the old style Syringe.

Second. All intermittent Syringes inject more or less air, which is invariably drawn back into the tubes while the Bulb is expanding and refilling. The injection of air is often painful and dangerous. *The steady and continuous flow through the pipes of the Alpha Syringe, when in use, absolutely prevents this back action; therefore no air can be injected.*

Third. All intermittent Bulb Syringes act only while the liquid is being squeezed out of the Bulb—a slow and tedious action, requiring strength. *The Alpha Syringes produce a continuous or non-intermittent stream with less than half the exertion required to operate common Syringes, and, unlike other Syringes, the flow is not only continuous, but can be either gentle or strong, at the easy control of the user. In fact, a child can operate the "Alpha."*

Fourth. Many intermittent Syringes become offensive and disgusting from having the fecalized fluids of the rectum forced back into the rubber tubes. If these once get into the tubes, the Syringe cannot be easily cleansed. *The construction of the outlet tubes of the Alpha Syringes to produce a continuous flow, absolutely prevents anything of this kind. They are therefore the neatest Syringe made.*

The Alpha Syringes have received the indorsement and praise of the highest medical authorities as being the safest and easiest Syringe known for invalids to operate—never tiring the hand, perfect in cleanliness, durability and efficiency.

CONTAGIOUS DISEASES

REGULATIONS OF THE BOARD OF HEALTH

SECTION 98. 1. Whenever it becomes known to the principal or teacher in charge of a school that a contagious disease prevails in a house, other than a tenement, in which a child or children attending the school lives or live, such child or children shall be immediately excluded from the school, and shall not be readmitted except as elsewhere in this section provided.

2. Whenever the principal or teacher in charge ascertains that a contagious disease or other than smallpox or typhus fever exists in a tenement house, but on one floor only, a child or children living on another floor of the same house need not for this reason be excluded, but children thus situated must be questioned daily about their health and that of their respective families, and must be sent home at the first symptom of illness, or the first intelligence of contagion in their families

3. But if a contagious disease of any description exists on more than one floor of a tenement house, or if the disease existing on only one floor be smallpox or typhus fever, all children living in the house must be promptly excluded from the school.

4. Children excluded in pursuance of the above rules shall not be again permitted to attend school—

In case of scarlet fever, until three weeks after the *beginning* of the last case, on the floor or in the house, according to whether the exclusion has applied to a floor, or an entire house under the above rules.

In case of measles, until two weeks after the *beginning* of the last case on the floor or in the house, according to the extent of the exclusion.

In case of diphtheria, until one week after the *termination* of the last case, on the floor or in the house, according to the exclusion.

In case of scarlet fever, measles, or diphtheria, until a certificate of the Board of Health is produced, stating that the apartments, bedding, and clothing affected by the contagion have been properly disinfected.

If the disease be smallpox or typhus fever, children who have been in such a case excluded must not resume their attendance without producing a certificate from the Board of Health, stating that it is safe for them to do so,

5. New scholars applying for admission, living in houses or on floors where a contagious disease prevails, must be admitted or excluded in compliance with the above rules.

6. Principals and teachers in charge are required to communicate to the Clerk of the Board of Education any information received by them relevant to this subject not known to be in his possession.

7. Hereafter, all children attending the schools under the control of this Board, and residing in orphan asylums, infirmaries, homes, nurseries, or other institutions, shall regularly furnish to their respective principals weekly certificates signed by a duly licensed and competent physician of good standing, to the effect that during the week preceding the date of such certificate there were no contagious or infectious diseases of any kind in such asylum, infirmary, home, nursery, or institution, and no principal shall allow the attendance at school of any such children unless the certificate herein required is furnished as aforesaid; and all such certificates shall be preserved by said principals for one year.

8. If the certificate should show that there was any such disease in such orphan asylum, infirmary, home, nursery, or institution, or if any principal should, from any other source, ascertain the existence of any such disease in any such orphan asylum, infirmary, home, nursery, or institution, such principal shall forthwith dismiss from attendance all pupils residing in such orphan asylum, infirmary, home, nursery, or institution, and such pupils shall not be allowed to attend until authorized by the Committee on By-Laws, Elections and Qualifications of the Board of Education.

Syr. Hypophos. Co., Fellows

CONTAINS THE ESSENTIAL ELEMENTS of the Animal Organization—Potash and Lime;

THE OXIDISING AGENTS—Iron and Manganese;

THE TONICS—Quinine and Strychnine;

AND THE VITALISING CONSTITUENT—Phosphorus; the whole combined in the form of a Syrup, with a **SLIGHTLY ALKALINE REACTION.**

IT DIFFERS IN ITS EFFECTS FROM ALL ANALOGOUS PREPARATIONS; and it possesses the important properties of being pleasant to the taste, easily borne by the stomach, and harmless under prolonged use.

IT HAS GAINED A WIDE REPUTATION, particularly in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs. It has also been employed with much success in various nervous and debilitating diseases.

ITS CURATIVE POWER is largely attributable to its stimulant, tonic, and nutritive properties, by means of which the energy of the system is recruited.

ITS ACTION IS PROMPT; it stimulates the appetite and the digestion, it promotes assimilation, and it enters directly into the circulation with the food products.

The prescribed dose produces a feeling of buoyancy, and removes depression and melancholy; *hence the preparation is of great value in the treatment of mental and nervous affections.* From the fact, also, that it exerts a double tonic influence, and induces a healthy flow of the secretions, its use is indicated in a wide range of diseases.

DRY HOT AIR, VAPOR AND OTHER MEDICINAL BATHS AT PATIENTS' HOMES.

New York School of Training for Massage,

78 West 46th St., Corner 6th Avenue.

FIRST ESTABLISHED IN 1862.

References (on application) of the very highest order to eminent physicians and lay people.

SKILLED

Male and Female Operators Supplied to any part of the City or Country on the Shortest Notice.

The purpose of these Schools is:

I.—To counteract, as far as possible, the ill effects produced upon the public mind by Massage and so-called Swedish Movement "cure" charlatans, whose incompetency and presumption have gone far to disgust the medical profession and to mislead others in regard to the real therapeutical advantages of the art.

II.—To put into this field of auxiliary usefulness a class of systematically trained male and female operators of good moral character and possessing all the NECESSARY requisites of health, disposition, physique, and training. A certificate of qualification is granted to successful graduates by the Instructor and signed by not less than two medical men, constituting a Committee of Examiners.

III.—To offer advantages to ladies and gentlemen desirous of acquiring some knowledge of the art themselves for use in their own families, *or for having their maids or valets taught.*

EDWIN T. OSBALDESTON,

INSTRUCTOR,

Formerly Surgeon *S. S. McGregor* and *Micado*, of the Australian Pacific Mail Company's service.

This College is now in the eighteenth year of its existence. Many Professors of its Faculty have been engaged in teaching veterinary science for *over twenty-five years*, and it offers to students advantages unequalled by any other college.

The system of instruction embraces a thorough Didactic and Clinical Course. The American Veterinary Hospital, which is a branch of the College, has treated since its opening over 40,000 cases. It is utilized for the clinical instruction of matriculates and affords unrivaled facilities.

The regular term opens in the beginning of October, and closes at end of March. For further information or catalogue address A. LIAUTARD, M.D., V.M., Dean of the Faculty, 141 West 54th St.

REQUIREMENTS FOR GRADUATION.

CHAPTER 443, LAWS OF 1888.

Section 5. The said trustees and their successors shall have the power to confer the degree of Doctor of Veterinary Surgery, and issue veterinary diplomas to only such students as shall have attained the age of twenty-one years, shall be of good moral character, shall have received a good English education, and pursued at least a full three years' course of medical and veterinary study, after the age of eighteen years, *including* attendance upon at least *two regular sessions of medical and veterinary lectures* in a regularly incorporated veterinary college or veterinary or medical department of a college or university, the last of which sessions of study shall have been at said American Veterinary College, and shall have passed the examinations prescribed by the rules and regulations of the American Veterinary College.

Graduates of incorporated *medical* colleges and graduates of veterinary medicine will be required to attend one regular session of lectures in this College.

Graduates of agricultural colleges will have an allowance made them for such branches as they may have attended on subjects embraced in the curriculum of this College (viz., the fees of such lectures), provided they can pass a satisfactory examination on said branches *immediately after matriculating.* The same privileges are granted to regular graduates of colleges of pharmacy.

CAUTION.

Beware of a substitute Malt Extract put up in a squatty bottle with names "Johann Hoff" and "Moritz Eisner" on neck. This new firm, trading under the name of "Johann Hoff," for which the Eisner & Mendelson Co. are agents, were found **GUILTY** of publishing a fictitious court decision, **GUILTY** of uttering a false affidavit, by the Berlin Court, the Prussian Royal Landgericht, for the purpose of extending the sales of their substitute preparation.

What confidence can be placed in statements made by a firm found guilty of such practices?

In order to protect yourselves and unwary patients against substitution always specify

Tarrant's when prescribing *Hoff's Malt*,

which alone will insure the genuine article being supplied.

Carbonate of lithia dissolved in water, certainly does not have the same effect as **Bear Lithia Water.** This is the experience of many of our most eminent Physicians. Phosphate of ammonia and so-called solvents of uric acid, outside of the Natural LITHIA WATERS, are without notable effect. Nature prepares the remedy at the Bear Lithia Spring, and is not favorable to any interference upon the part of Chemists, and refuses to be imitated or counterfeited.

Cerebral congestion producing insomnia, which is often the effect of over mental work, sometimes producing insanity, may be relieved by rest, and flooding the kidneys with BEAR LITHIA WATER, the urine will then cease to deposit uric acid crystals. Under the influence of the cleansing the patient regains his spirits, pains in the head disappear, and the system is put in a fair way to throw off disease. Nervous diseases are often caused by excess of uric acid in the blood; use BEAR LITHIA WATER at once, and the morbid irritability will disappear. The lithasmic condition is overcome and the brain congestion is relieved. Phosphates of ammonia may give temporary relief, but BEAR LITHIA WATER will cure diseases brought on by excess of uric acid.

ORDINARY MASS PILLS

Frequently suffer but little change in passing through the alimentary tract. While this is sometimes due to an abnormal condition of the digestive secretions, it can usually be traced to the fact that all excipiated pills harden and become insoluble with age, frequently assuming an almost horny consistency.

Upjohn's Friable Pills & Granules

Having a very soluble, thin coating, inclosing an exact quantity of the pill ingredients in powder form, are quickly disintegrated by digestive action. Containing no excipient, this soluble condition is permanent. As the physician has no means of knowing how long a pill has been made before it is dispensed on his prescription, these advantages are manifest.

The fact that our goods are generally introduced insures their being supplied when specified.

OZONE.

The particular attention of the Medical Profession in general is directed to the following valuable and important stable therapeutic preparations of OZONE, ***the genuine merits of which are now attracting the serious notice of scientific practitioners.***

KODOZONOL A combination pure Norwegian Cod Liver Oil, with 6 vol. per cent of Ozone, and a small proportion of hypo-phosphites. The Ozone imparts an agreeable flavor, and the oil thus prepared is readily assimilated by the most delicate digestive organs. *This remedy is yielding excellent results in the treatment of the first and second stages of phthisis.* It has also great efficiency in anæmia and nervous prostration.

AQUZON Distilled and sterillized water holding in solution 2.5 vol. per cent. Ozone. Its use in practice indicates it to be an efficient remedy in ***diabetes, fevers*** *and affections requiring a powerful oxydizer.*

THERAPOL For external use. Sweet oil combined with 8.75 vol. per ct. Ozone, a potent antiseptic rapidly subduing inflammation in ***erysipelas, ulcers, burns, cuts, etc.*** *It prevents the formation of pus.* A most valuable addition to the pharmacopœia.

AEROZOL A combination of essential oils, containing 25 vol. per cent. of Ozone, unequalled for improving the hygienic conditions of the sick room by the evolution of free Ozone. Particularly valuable in ***Diphtheria and Scarlet Fever.***

A celebrated chemist, whose report we have in our office, ***submitted all our products to a searching analysis, and states that OZONE is present therein in the quantities above given. He certifies as to their integrity, and says that he knows of no other Ozone preparations on the market.***
